

OneGlobe achieves Oracle Partner Network Specialization for delivering Oracle Infrastructure as a Service (IaaS)

Oracle recognizes OneGlobe for expertise in delivering Oracle Infrastructure services.

May 8, 2017 – OneGlobe, a global business technology consulting and solutions company with a Gold level membership of the Oracle Partner Network (OPN), today announced it has achieved OPN Specialized status for delivering Oracle Infrastructure Services in the Oracle Cloud.

Today's organizations are operating in a rapidly changing market place and businesses expect IT infrastructure to keep up with their growing needs. Infrastructure is expected to be scalable, flexible and deliver predictable performance. Oracle IaaS provides customers with on demand access to infrastructure resources in the public cloud empowering them with complete flexibility to choose the computing power and storage capacity that aligns with their specific needs at any point in time.

With this specialization, OneGlobe is well positioned to help organizations of all sizes to understand and effectively manage their IT Infrastructure in the cloud. OneGlobe provides strategic guidance and works as a trusted partner enabling organizations to transition to the cloud with confidence and certainty.

'With Oracle IaaS, our customers are able to elastically manage their enterprise workloads in the cloud and get predictable performance in a highly secure environment. Our customers are realizing up to 40% cost benefits by migrating to cloud environments and enabling their internal resources to focus on strategic growth activities.' - said Lawrence Crooks, Managing Director – North America Business.

Oracle Quote – 'We are seeing an increased demand from our customers to migrate their on-premises infrastructure to the cloud to take advantage of the various benefits that a cloud ecosystem provides, specifically around Agility, Flexibility and Predictability. We congratulate OneGlobe on achieving Oracle IaaS OPN specialization as we continue to advise our customers to work with trusted and specialized partners to manage their cloud environments.' – said Kimberly Lasseter, Senior Director of the Global PartnerNetwork, Oracle.

To achieve OPN Specialized status, partners must meet a stringent set of product-specific competency and business requirements that are based on the needs and priorities of the customer community. By achieving a Specialized distinction, OneGlobe has been recognized by Oracle for its expertise in delivering services specifically around Oracle IaaS through competency development, business results and proven success. Specialization can provide customers with confidence that a partner is qualified in the defined product or industry area and able to successfully develop, architect and implement specific solutions.
